

Dividend Aristocrats

September 30, 2026 · Comparisons ending in FY2025

Printable reference for the interactive analysis. All 66 companies, both comparison periods, figures, source filings, and exceptions.

66 current constituents, excluding REITs. Requested periods: FY2020-FY2025 and FY2005-FY2025.

How to read the results

"Both increased" means revenue and GAAP diluted earnings per share (EPS) ended above their starting values. The other labels identify whether revenue, EPS, or neither increased. These are cumulative comparisons; growth is not required in every individual year.

"Shorter history" identifies a comparison with a later starting year. Its result describes that available period only. Actual fiscal years appear beside the figures. Missing or incomparable evidence is not filled with an estimate.

An EPS increase can include a recovery from a loss. Percentage EPS growth is not shown from a zero or negative base. Acquisitions, disposals and spinoffs can change what a company contains; the company notes explain known differences.

Reporting basis affects some results. The main tables compare reported statement figures. Chevron and Exxon have twenty-year revenue declines on that basis but growth on the separately disclosed supplemental basis. Brown-Forman's revenue growth percentage also changes. See their highlighted notes.

The analysis does not assess valuation, dividend safety, investment returns or suitability.

Interactive analysis and CSV: sam-sharps.github.io/dividend-aristocrats-site/

Methodology & source dates

- Universe: the 69 S&P 500 Dividend Aristocrats reflected in dated September 29, 2026 ProShares NOBL holdings, excluding the three REITs ESS, FRT and O. The holdings are cross-checked against S&P index information; fund cash is excluded.
- Annual GAAP revenue and diluted EPS from continuing operations. FY2025 is the common fiscal-year endpoint, compared with FY2020 and FY2005. Fiscal calendars differ; exact period-end dates are retained.
- All 66 FY2025 annual reports are available as of the research date. Some issuers already have FY2026 annual results, which are noted; the common FY2025 endpoint avoids mixing fiscal-year labels. No FY2025 filing is flagged as outstanding.
- "Both increased" means ending revenue and ending diluted continuing-operations EPS each exceed their starting values. This is cumulative endpoint growth, not annual growth every year or positive profit in every intervening year.
- Growth percentages use $\text{end/base} - 1$ only when the starting value is positive. Zero and negative starting EPS retain dollar-per-share endpoints and are evaluated as improvement or decline; no conventional percentage or CAGR is invented.
- Latest available annual-filing comparative figures as of September 30, 2026 are used for recent endpoints. Historical manual entries identify their filing and reporting scope. Revenue taxonomy selection favors total GAAP revenue, with issuer-specific concepts documented.
- Where only total diluted EPS is tagged, continuing-operations equivalence is verified against the same filing using an explicit zero discontinued-operations amount, income-statement review, or a retained pretax/tax/net-income reconciliation within reported rounding.
- EPS is placed on a consistent share basis. True share splits and reverse splits are distinguished from market-data price adjustments for spin-offs. Underlying historical figures, factors, corporate-action sources and raw evidence are retained.
- Spin-offs, mergers, acquisitions, disposals, accounting changes and currency effects can alter reporting scope. These are as-reported GAAP comparisons, not organic growth or a constant-business reconstruction.
- Short histories are shown separately using the earliest supportable audited company or carve-out values. They are not full five- or twenty-year comparisons. Missing evidence remains incomplete; no estimates are substituted.
- This is a dated financial screen, not a stock-price return backtest or a recommendation. Current-constituent selection means it does not describe the experience of buying the index twenty years ago.
- Reporting-basis sensitivity: ExxonMobil and Chevron's twenty-year revenue results change direction if specifically disclosed historical excise taxes and gross buy/sell transactions are removed. Main classifications follow reported GAAP sales, with illustrative alternatives separately labeled. Brown-Forman also changed excise-tax presentation. These comparisons are not uniformly like-for-like.

Reading the tables

Revenue figures are USD billions. EPS is USD per diluted share, adjusted for identified splits. Growth is cumulative change, not an annualized rate. Detailed pages give actual fiscal years, amounts, exceptions, and linked source filings.

A dash means unavailable or a percentage that is not mathematically meaningful. Shorter-history results must not be compared as though they cover the full five or twenty years.

Five years: all companies

Requested FY2020 → FY2025. Each result describes the figures on the stated reporting basis. Detailed figures and source links follow both overview tables.

Company	What changed	Revenue change	EPS change	Base FY

Company figures & evidence

Sources are linked to the original filing or company report. Where EPS comes from total diluted earnings, the evidence record verifies its equivalence to continuing operations. Additional source facts and split adjustments are retained in the downloadable data.

ABBV · AbbVie

Health Care

Period / what changed	Revenue (\$B)	Revenue change	Diluted EPS (\$)	EPS change
Five years EPS did not increase	45.804 → 61.16 FY2020 → FY2025	+33.5%	2.72 → 2.36 FY2020 → FY2025	-13.2%
Twenty years Shorter history EPS did not increase	14.214 → 61.16 FY2009 → FY2025	+330.3%	2.94 → 2.36 FY2009 → FY2025	-19.7%

AbbVie separated from Abbott in 2013. FY2009 is the earliest audited carve-out year in its initial registration. The later 2013 prospectus reports FY2009 diluted EPS using the actual distribution share count. Earlier FY2008 selected data are explicitly unaudited and excluded. This is a sixteen-year carve-out comparison, not a twenty-year stand-alone history.

AMCR · Amcor

Materials

Period / what changed	Revenue (\$B)	Revenue change	Diluted EPS (\$)	EPS change
Five years EPS did not increase	12.468 → 15.009 FY2020 → FY2025	+20.4%	1.935 → 1.6 FY2020 → FY2025	-17.3%
Twenty years Shorter history Both increased	9.421 → 15.009 FY2016 → FY2025	+59.3%	1.3 → 1.6 FY2016 → FY2025	+23.1%

Audited US GAAP financial statements of Amcor Limited, the accounting predecessor. The first 2019 S-4 includes audited FY2016-2018 statements. FY2014-2015 US GAAP summary values are expressly unaudited and are not used. Historical Amcor shareholders received one Amcor plc share per old share; later Bemis and Berry acquisitions change the business scope.

Nine-year growth span from FY2016 to FY2025, with FY2025 share basis including the January2026 reverse split.

FY2026 annual results are available; FY2025 is retained for the common fiscal-year comparison.

FY2020 EPS divided by 0.2 for the subsequent stock split; unadjusted value and company source retained.

Historical reported EPS \$0.387 divided by the verified remaining share-count factor 0.2 gives \$1.935 on the endpoint share basis.

Historical reported EPS \$0.26 divided by the verified remaining share-count factor 0.2 gives \$1.3 on the endpoint share basis.

Earliest audited US GAAP paired revenue and diluted EPS in the original Amcor plc registration is FY2016. Amcor is older; this shorter series reflects audited accounting-basis availability, not the age of its business. FY2014-2015 US GAAP figures in the registration are unaudited.

BF-B · Brown-Forman

Consumer Staples

Period / what changed	Revenue (\$B)	Revenue change	Diluted EPS (\$)	EPS change
Five years Both increased	3.363 → 3.975 FY2020 → FY2025	+18.2%	1.72 → 1.84 FY2020 → FY2025	+7.0%
Twenty years Both increased	2.227 → 3.975 FY2005 → FY2025	+78.5%	0.591 → 1.84 FY2005 → FY2025	+211.4%

Twenty years · Historical revenue presentation differs; the main result is not a like-for-like accounting comparison.

Supplemental revenue comparison · Twenty years

\$1.81B → \$3.975B; +119.6% cumulative growth. This separate comparison does not replace the reported figures used in the main screen.

Illustrative FY2005 sales after the separately disclosed excise taxes: \$2.227bn - \$0.417bn = \$1.810bn. This is a separate derived comparison, not the main reported-GAAP screen.

FY2005 restated for discontinued operations in 2006 report; Historical sales include excise taxes; the main as-reported comparison and separately labeled net-of-excise illustration disclose that presentation change. Subsequent 5-for-4 stock distributions require EPS adjustment.

Historical EPS is retained as reported; comparable EPS is reported EPS divided by the verified remaining split factor.

REVENUE BASIS CHANGED: FY2005 reported net sales of \$2.227bn precede a separate \$0.417bn excise-tax expense line; the current net-sales presentation excludes excise. An illustrative net-of-excise FY2005 base is \$1.810bn. The main screen keeps the reported historical amount and is not a constant-presentation comparison.

FY2026 annual results are available; FY2025 is retained for the common fiscal-year comparison.

Historical reported EPS \$2.77 divided by the verified remaining share-count factor 4.6875 gives \$0.590933 on the endpoint share basis.

CVX · Chevron Corporation

Energy

Period / what changed	Revenue (\$B)	Revenue change	Diluted EPS (\$)	EPS change
Five years Both increased	94.471 → 184.432 FY2020 → FY2025	+95.2%	-2.96 → 6.63 FY2020 → FY2025	-
Twenty years Revenue did not increase	193.641 → 184.432 FY2005 → FY2025	-4.8%	6.54 → 6.63 FY2005 → FY2025	+1.4%

Twenty years · The reported revenue decline is sensitive to changed excise-tax and gross buy/sell presentation.

Supplemental revenue comparison · Twenty years

\$161.1B → \$184.432B; +14.5% cumulative growth. This separate comparison does not replace the reported figures used in the main screen.

Illustrative FY2005 sales excluding the disclosed \$8.719bn excise taxes and \$23.822bn gross buy/sell transactions: \$193.641bn - \$8.719bn - \$23.822bn = \$161.100bn. This is a separate derived comparison, not the main reported-GAAP screen.

Revenue is sales and other operating revenues, excluding equity affiliates/other income; includes then-reported excise taxes and buy/sell contracts. The current endpoint also uses sales and operating revenue, excluding affiliate and other income; legacy excise/buy-sell presentation differs and is separately disclosed.

Historical EPS is retained as reported; comparable EPS is reported EPS divided by the verified remaining split factor.

REVENUE BASIS CHANGED: FY2005 reported sales of \$193.641bn include \$8.719bn excise taxes and \$23.822bn gross buy/sell transactions. Removing those disclosed amounts gives an illustrative \$161.100bn base; against FY2025 sales of \$184.432bn that is +14.5%. The main as-reported revenue decline, and therefore the full-period result, is sensitive to this accounting presentation change.

Growth percentage is undefined for a zero or negative starting value; the endpoint change is shown instead.

XOM · ExxonMobil

Energy

Period / what changed	Revenue (\$B)	Revenue change	Diluted EPS (\$)	EPS change
Five years Both increased	178.574 → 323.905 FY2020 → FY2025	+81.4%	-5.25 → 6.7 FY2020 → FY2025	-
Twenty years Revenue did not increase	358.955 → 323.905 FY2005 → FY2025	-9.8%	5.71 → 6.7 FY2005 → FY2025	+17.3%

Twenty years · The reported revenue decline is sensitive to changed excise-tax and gross buy/sell presentation.

Supplemental revenue comparison · Twenty years

\$297.403B → \$323.905B; +8.9% cumulative growth. This separate comparison does not replace the reported figures used in the main screen.

Illustrative FY2005 sales excluding the disclosed \$30.742bn excise taxes and \$30.810bn gross buy/sell transactions: \$358.955bn - \$30.742bn - \$30.810bn = \$297.403bn. This is a separate derived comparison, not the main reported-GAAP screen.

Sales and other operating revenue excludes \$7,583 million affiliate income and \$4,142 million other income. Includes \$30,742 million excise taxes and \$30,810 million gross buy/sell contracts. Match the 2025 accounting basis before comparing.

Historical EPS is retained as reported; comparable EPS is reported EPS divided by the verified remaining split factor.

The July 2026 holding-company redomiciliation exchanged shares one-for-one; financial history uses verified predecessor Exxon Mobil Corporation (CIK 34088).

REVENUE BASIS CHANGED: FY2005 reported sales of \$358.955bn include \$30.742bn excise taxes and \$30.810bn gross buy/sell transactions, unlike the later presentation. Removing these explicitly disclosed items gives an illustrative \$297.403bn base; against FY2025 sales of \$323.905bn that is +8.9%. The main as-reported revenue decline, and therefore the full-period result, is sensitive to this accounting presentation change.

Growth percentage is undefined for a zero or negative starting value; the endpoint change is shown instead.
